

**INTERNATIONAL COLLECTION OF
ARBUSCULAR & VA
MYCORRHIZAL FUNGI**

*To be completed by the contributor of one or more fungal isolates.
Please print or type.*

1. Scientific name and author(s), if known: _____

2. Identified by: _____

3. Background data:
 - a) Isolated/cultured by: _____ Date: _____
 - b) Geographic location (any information that can be provided, such as distance and direction from nearest town/city, region/county/state, country, GPS coordinates): _____

 - c) Description of habitat (e.g. arid, mesic, tropical, temperate, pasture, forest, cropland, etc.): _____
 - d) Associated host, if known: _____
 - e) Soil properties (e.g. color, texture, pH, organic matter content, nutrient levels such as N, P, K, Ca, etc.): _____

4. Culture history:
 - a) Date started: _____ Date harvested: _____
 - b) Culture host: _____
 - c) Inoculum (e.g. mix of roots and attached soil, spores only, roots only, etc.): _____

 - d) Growth medium: _____
 - e) Pot setup (e.g. inoculum mixed 1:10 with growth medium, inoculum layered in 10 cm band, spores inoculated onto 10-day-old seedlings, etc.): _____

 - f) Comments/Notes: _____

5. Reason for deposit (e.g. terminating experiments, moving to new location, preservation, donation for use by other scientists, need identification of species, etc.): _____

6. If this material was not isolated or cultured by you, indicate from whom you received it: _____

7. If there limitations on the distribution of deposited germplasm, please specify: _____

8. Special considerations or purposes, if any: _____

9. Legal status of deposit (one of the three boxes below must be checked):

- The contributor designates this germplasm material for the general collection so that batches will be made in pot culture and distributed to the scientific community and the public for a fee that covers a small fraction of expenses incurred by INVAM.
- The contributor designates this germplasm material for special purposes (designated in item 8 above) and prohibits distribution of original or repropagated material without express permission accompanied by a Material Transfer Agreement.
- The contributor designates this germplasm material for specific research purposes by INVAM (identification, experimental use, etc.), and neither it nor repropagated material is allowed to be accessed in the collection.

10. Considerable manipulation sometimes is required to obtain a successful and productive outcome of accessed material. Please check one or more of the options below:

- Notify me of the status of the accessed material and any pertinent information that affected the outcome as it becomes available.
- I am not interested in the fate of the accessed material.
